Skillset

Python - C++ - Javascript - C#

React - HTML/CSS - Firebase

CRUD operations

Reinforcement Learning (AI)

Github & Perforce

Teamwork & communication

Language

English

Norwegian - Fluently

Kurdish

Jehad Babawat

Developer

Experience

Fullstack Developer

2025 - 2026

Brobyggere AS

- Developed a **proprietary Booking/HR web application** using **React** and **Firebase**
- Enabled consultants to manage clients, employees, orders, messaging, and feedback
- Built collaboratively from **scratch**; system is live and actively used
- Supports **full CRUD operations**, live chat, and advanced filtering

AI Programmer (Thesis Project)

2025 - 2026

University in South-east Norway

- Designed and implemented an **Unreal Engine** game to study **dynamic difficulty** using **reinforcement learning** (AI)
- Aimed to keep players in a state of flow through real-time difficulty adjustments
- Collected and analyzed player performance data via **in-game telemetry**

Data science & management

2024 - 2025

University in South-east Norway

- Learned principles of **data modeling**, **database systems**, and data quality, with a focus on designing, optimizing, and managing structured data using relational models
- Gained hands-on experience with **data analysis**, **visualization**, and processing using real datasets and modern tools in practical scenarios

Unreal Engine 5 C++

2024

Udemy | Online Course

- Learning Unreal Engine 5.6 using **C++**, focusing on **OOP**, basic AI, and game logic
- Using both **Blueprints** and C++ within the Unreal Gameplay Framework to create clean, **functional systems**

Education

Master in Computer Science

University in South-east Norway

2024 - 2026

- Research-based degree in computer science, software engineering, and AI, with a strong foundation in programming, system architecture, and problem-solving for interactive and game-related systems.

Information Technology Engineer

2020 - 2024

University in South-east Norway

- Practical engineering degree with focus on programming, system development, and technical communication in Norwegian and English.
